Focus on **Education**

Access Campus Information in a Whole New Way

When a technician is working on the roof of the library, the last thing he or she needs is a timeconsuming trip to the planroom to find more information. ARC Facilities provides instant access to equipment details, O&Ms, shutoffs and As-Builts right on the technician's phone.

Simple

We've replaced complexity with simplicity so tasks that used to take hours can now be accomplished in seconds. Imagine how complicated things become when a contractor is given the wrong As-Builts for a renovation project. With ARC, finding the right As-Builts is as simple as looking at a map and tapping the screen.

Smart

Our artificial intelligence (AI)-powered technology is genuinely smart. Running in the cloud, it knows how to extract intelligence from your legacy documents and building drawings. It then organizes your information so anyone can quickly and easily find exactly what they need.

One Platform, Four Modules

ARC Facilities is a game-changer for facilities professionals. Unlike legacy systems, our solution is optimized for mobility, speed and simplicity. We use AI and machine learning to extract intelligence from building, equipment, emergency and compliance documents so anyone can find what they need. It's lightning-fast and as easy-to-use as any of your favorite apps.

Interactive maps identify where shutoffs are physically located. Teams can respond quickly and safely to prevent damage or personal injury.

ARC Buildings

Instantly access building information including plans, As-Builts and shutoff locations. Eliminate wasted time searching planrooms, computers and network drives.

ARC Equipment

Use interactive maps to instantly locate equipment in a building or on a campus. Technicians access O&Ms, photos, service logs, and more to quickly complete maintenance and repairs.

ARC Emergency

Emergency situations develop suddenly and escalate quickly. Instantly access critical building, life safety, and equipment information to minimize damage and protect lives.
